

# ADVANCED RECYCLING OF HETEROGENEOUS PLASTIC WASTE

The ultimate generation of recycling technologies

19<sup>th</sup>-20<sup>th</sup> February 2013 ■ San Giorgio su Legnano MILANO ■ Italy

- 3 leading companies in extrusion/compounding, filtration and pelletizing systems
- 3 innovative systems for recycling of heterogeneous plastic waste
- 3 factors for success: innovation, profitability, differentiation

## ICMA, ETTLINGER, FILTEC will show their products on a high technology recycling line

**ICMA CO-ROTATING TWIN SCREW EXTRUDER** - Perfect mixing for heterogeneous materials even with high water or pollution content

**ETTLINGER FILTRATION SYSTEMS** - Continuous filtration of all sorts of polymers with low to very high levels of contamination

**FILTEC PELLETIZING SYSTEMS** - High quality and uniformity for pelletizing also with recycled materials

ICMA CO-ROTATING  
TWIN SCREW EXTRUDER

ETTLINGER FILTRATION  
SYSTEMS

FILTEC PELLETIZING  
SYSTEMS

## PROGRAMME

**10.00** .....Registration

**10.30** .....Welcome

*Dott. G. Colombo ICMA SAN GIORGIO*

**10.40** .....Advantages of co-rotating twin screw extruders  
for advanced recycling plants

*Ing. C. Moneta ICMA SAN GIORGIO*

**11.00** .....Continuous melt filters ERF – High technology in filtration  
*I. Talenti ETTLINGER*

**11.20** .....High quality in pelletizing for recycled materials  
*M. E. Veronese FILTEC*

**11.40** .....Demo: Recycling of post-consumer scrap from bumpers

**12.30** .....Lunch

**14.00** .....Demo: Recycling of post-consumer scrap from packaging films

**15.00** .....Meetings B2B

CONTACT US:

**ICMA SAN GIORGIO**  
Advanced Compounding and Extrusion Systems

**Laura Zoia**

Via Madonnina,75  
20010 San Giorgio Su Legnano (MI) - Italy
